

Learning Toolbox

Last Updated Monday, 05 October 2009

Helping students become self-directed, lifelong learners is part of our District's vision. The intent of the Learning Toolbox is to provide links to educational content, AND arouse students curiosity in order to learn more.

Lake Shore Moodle

School Library System database links for

Elementary Schools

Middle School

High School

(see your Librarian for passwords to access these or stop in at Open House)

Login

(see your classroom teacher for login procedures)

WiredWithWisdom

Internet Safety Training for Lake Shore Parents

Your child's school has been chosen to participate in Wired With Wisdom online learning adventure at no cost. The Wired With Wisdom program was developed specifically for parents by Web Wise Kids. You have the opportunity to test this program and give us your much-needed feedback.

Keeping our children safe online has become a very real problem. It is a shared responsibility of parents, teachers, law enforcement and community to protect our children from online dangers. We as parents need to do our part and can only do that if we learn to identify the risks that our children are facing in the digital world. This program will not only point out the problems, but it will also introduce the solutions that you need to guide your children to make wise choices online.

For how to participate, please contact either the MS or HS Counseling office, email sciminelli@lakeshore.wnyric.org or refer to the Lake Shore Counselor's December newsletter.

enVision Math Series

enVision Math eTools Manipulatives

enVision Premium Content

(Please note that these resources are only available when on the Lake Shore network.)

Cisco Network Academy

(for students enrolled in Cisco Network class, see Mr Linn for your login)

Teacher-created webpages

have a new link.

Click on Staff Web Pages in the Navigator bar

Teachers pages are grouped by building or general.

The links below are not District webpages, but resources found on the Internet which are owned by various government agencies or organizations. When you click on these links, keep in mind that you will be leaving the Lake Shore District website and visiting a webpage that is not created or maintained by our District.

This is the organization that produced the "Missing" game which our Middle School students have played to learn about online safety. For more information about our implementation, visit the About Technology page on this website. For more information about Internet Safety, visit www.webwisekids.org

Primary (K-2) Links

Upper Elementary (3-5) Links

Middle School (6-8) Links

High School (9-12) Links

(Some links require Adobe Acrobat Reader.)

Please contact webmaster@lakeshore.wnyric.org if you find a link is not working or have questions regarding this segment of our Lake Shore website.

Thank you,

Susan Ciminelli, District Technology Coordinator
