

HTML 2nd Assignment

This is to be done AFTER you have read through chapters and played around with some of those concepts! You will be creating another file in the folder called **HTML**. In that folder you will be creating a file named: **HTML2.html**.

1. Create another file in Notepad. Save this new file in your HTML folder with the filename of: **HTML2.html**
2. The html used for this page is shown below. Enter this text in notepad. Watch out for the syntax. An example of your final web page is shown on the next page.

```
<HTML>

<HEAD>
  <TITLE>My Second Web Page</TITLE>
</HEAD>

<BODY>
  <H1>My Second Web Page</H1>
  <H2>My Name is (enter your first and last
    name)</H2>

  <P style="color:blue">Please notice how this text
is blue. Why? (Place your answer here)</P>

  <P style="color:black">Back to black again.</P>

  <UL>
    <LI>Each list must start with the UL tag.
    <LI>Each list must end with a /UL tag.
    <LI>UL lists mean unordered list (aka. bullets)
    <LI>OL lists are ordered (aka. numbers or
      letters)
    <LI>Each item of list should start with an LI
      tag.
    <LI>Look at this list and compare to other ex.
      in book.
  </UL>

</BODY>
```
